WORK EXPERIENCE

Frontend Engineer (SDE 2)

smallcase Technologies Private Limited

12/2019

Achievements

- Led the design, development, and launch of *Smallboard*, a company-wide engineering utility that became the primary tool for product support, improving operational efficiency and adoption across teams.
- Managed project planning, resource allocation, and timelines to deliver high-impact features aligned with business priorities.
- Designed and implemented an Identity and Access Management (IAM) system for *Smallboard*, incorporating scalable architecture and robust development practices.
- Migrated a monolithic repository into independent services while preserving commit history, and re-architected the OAuth and login flow for improved security and maintainability.
- Optimized application performance, increasing application speed and responsiveness, boosting performance scores and cutting load times by over 70%, leading to a smoother user experience.
- Migrated application from CRA to Vite, reducing build time by 60% and improving hot-reload speed, enabling faster development cycles and smoother deployments.
- Upgraded core frontend frameworks and libraries, resolving deprecated APIs and reducing technical debt, which improved maintainability and enabled faster feature development.
- Contributed to the Broker Platform by converting pixel-perfect UI designs into responsive, production-ready code, ensuring seamless user experiences across devices.

Contact : Praveen Puglia - +91 90302 00798

Frontend Developer

Eve Health Software Analytics

07/2017 - 12/2019

Achievements

- Proficiently developed web applications using React and JQuery emphasizing optimised, clean code and test-driven development techniques.
- Independently designed and Spearheaded UI for multiple internal projects from conception to completion.

TECHNICAL SKILLS

Languages & Frameworks

JavaScript (ES6+), TypeScript, ReactJS, Redux, Next.js, Node.js, Express, HTML5, CSS3, SCSS, jQuery, Socket.IO, Websocket

Build & Tooling

Webpack, Vite, GIT, npm/yarn, Babel

Concepts & Practices

SPA Development, Component Architecture, State Management, Performance Optimization, Responsive Design, Web Security (OAuth 2.0, SameSite Cookies, XSS Prevention), IAM Architecting.

Testing

Mocha, Chai, Jest

Other Tools & Skills

antd, CI/CD (GitHub Actions, Railway.app), Agile/Scrum.

PROJECTS

Web RTC POC for Tech Talk Demo [🔗](#)

- **Built** a proof-of-concept **WebRTC implementation** demonstrating real-time, peer-to-peer browser communication using **RTCDDataChannel** and **Socket.IO-based signaling**.
- **Implemented** custom React hooks for managing peer connections, SDP negotiation, and ICE candidate handling with STUN/TURN server configuration.
- **Delivered technical talks and live demos of the WebRTC POC** [🔗](#) at internal sessions and external tech meetups, explaining core concepts such as **SDP, ICE candidates, and NAT traversal** in a developer-friendly manner [🔗](#).

Lost and Found (Hobby/Side Project) [🔗](#)

- Developed Node.js server and ReactJS-based frontend from the ground up.
- Effectively integrated JWT for secure authentication, along with Auth0 for social login, and MongoDB for efficient data storage.
- Implemented CI/CD using CircleCI and Heroku, ensuring continuous integration and deployment for efficient delivery.

EDUCATION

— Bachelor of Engineering in Computer Science JNN College of Engineering

07/2017
